Enable Windows-Like Features on Your Mac
By **Harry Guinness**,17 hours ago

For both power users and luddites alike, moving from a Windows PC to a Mac can be a confusing leap. In the previous tutorial, Alex talked about *The 5 Things You Must Know When Converting From Windows to Mac*.
In this tutorial I will take a slightly different approach and, instead, show you how to make some of OS X's features behave in a manner more similar to their Windows counterparts. In addition I'll show you how to bring some of Windows' more useful features to your Mac.

How many times have you thought about scheduling an email to be sent at a later time than right now, only to realise Apple's Mail doesn't support that simple but oh-so-useful feature? If you're like most people, the answer is "often". Well, here's a plug-in that makes it happen. It's called "SendLater", it works with Apple Mail on Mavericks and it has a great interface. It simply works.

Has your gmail account been Hacked? How would you check?
