FREE APPLE iOS and OS X WORKSHOPS

The San Gabriel Valley Apple Users Group, in cooperation with Di-No Computers in Pasadena, is offering free workshops to the community covering Apple's latest mobile and desktop Operating Systems. These will be taught by an Apple specialist with many years of experience with Apple computers and devices. Attendees are encouraged to bring their own device(s) so they can immediately try out the techniques being taught while the instructor is available to answer their questions. Attendance is limited, so please register as soon as possible.
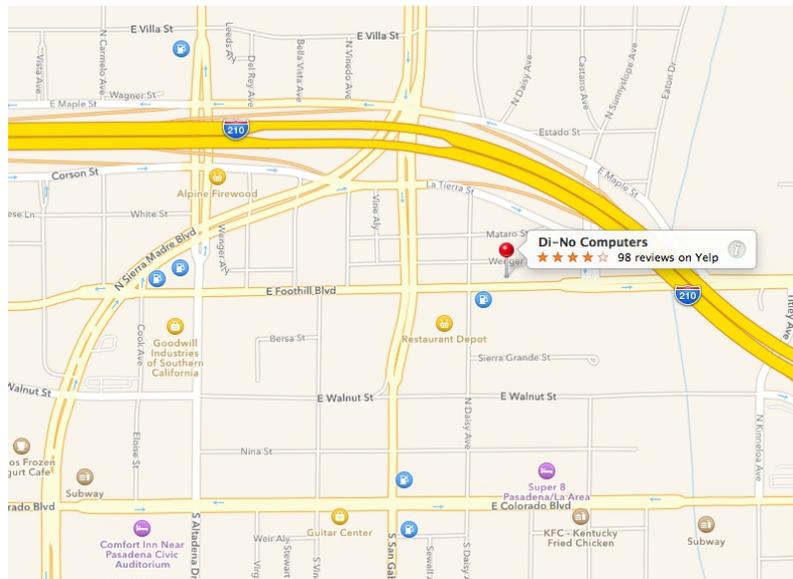

To register: **http://www.sgvaug.org/2015/02/19/workshop-sign-up/**

More information about the San Gabriel Valley Apple Users Group may be found at **http://www.sgvaug.org** including a link to signup for the classes.

Classes will be held at:

Di-No Computers
2817 E. Foothill Blvd.
Pasadena, CA 91107
(626) 795-6674

Workshop Descriptions

iOS 8

This is the latest update to Apple's mobile operating system. It presents a fresh look with new flatter-looking icons, a new clear font along with other updated user interface elements. These provide unified clarity and continuity throughout the operating system.

This workshop will give you an overall picture of how iOS 8 works and teach you how to get the most out of your iPhone, iPod Touch or iPad. Discover how to interact with your iOS 8 devices including external controls, touch screen, "predictive" keyboard and Apple's digital assistant Siri. Also covered will be essential tasks, making and receiving calls, emailing and browsing the web with Safari. Learn how to extend the functionality of your iPhone, iPod Touch or iPad by installing one of the 1+ million apps available in the Apple App Store. This workshop wraps up with some essential settings that will help you customize your device, protect your privacy and troubleshoot your device(s) whenever you encounter a problem.

OS X Yosemite

Learn the essentials of Yosemite, Mac OS X 10.10, Apple's latest operating system for Macintosh computers. In this workshop we will go over the core interface elements such as; Finder, the menus and the Dock. You will learn how to customize your computer so it works the way you want it to, discover ways to secure your personal data and find out how to troubleshoot common problems.

About the San Gabriel Valley Apple Users Group

The San Gabriel Valley Apple Users Group exists to help users get the most from their Apple devices, be they Macintosh computers, iPods, iPhones, iPads or (soon) iWatches. The group was founded in 1984 as the San Gabriel Valley Macintosh Users Group and for the past thirty years has been the San Gabriel Valley's support group for Apple users. In 2015 it changed its name to the San Gabriel Valley Apple Users Group (SGVAUG) in recognition of the wide expansion of Apple's product lines.

The SGVAUG presents regular meetings to the community covering the full range of Apple devices, software, and related accessories. Presentations focus on useful applications and hardware, Q&A sessions help resolve problems and the latest Apple news is presented and discussed. The monthly meetings and on-line interactions provide a social network allowing users of all ages and skills to share their knowledge and enthusiasm.

The SGVAUG meets monthly in Wright Auditorium at the main branch of the Pasadena Public Library (285 E. Walnut St.), typically on the third Monday of the month. Meetings are open to everyone, at no charge. Membership in the SGVAUG provides additional benefits, such as discounts on computer books and other 'members only' offerings. The schedule of meetings, topics, and much more can be found on their Web site: **http://www.sgvaug.org/**.
